

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

ANTIQUE GLASS AND ROUNDELS.

Superior in quality to any other similar article, and in a great variety of tints.

MANUFACTURED BY THE
Glass Factory at Schliersee, Bavaria.

For Sale Only by the Sole Agents,

J. MARSCHING & Co.,
27 PARK PLACE,
NEW YORK.

WALL TAPESTRIES.

We are now exhibiting some remarkable Wall Tapestries—copies from originals produced during the Sixteenth Century, and bearing a most wonderful resemblance to them. They are most interesting and artistic, having the mellow tones of old tapestry, and are extremely practical; a stuff by the yard and two widths of border, making possible the covering in a proper manner of the walls of any room. They are especially adapted for dining-rooms and halls.

JOHNSON & FAULKNER,
Importers of
UPHOLSTERY GOODS,
33, 35 & 37 EAST 17TH ST.,

HINTS AND NOTIONS.

To remove Gold Ring from the Finger.
The most simple and easy method to remove a gold ring which is too tight for the finger, is to rub it in one spot with a little quicksilver. It will soon break in this spot with a little pressure.

CASSELL'S TECHNICAL MANUALS.

A series of handy volumes, which contain the essentials of a complete Technical Education, and forming a valuable Library of Practical Information for the Artizan and Student of Technology.

ELECTRICITY IN THE SERVICE OF MAN.

A popular and practical treatise on the applications of Electricity in Modern Life. Translated and Edited, with Copious Additions, from the German of Dr. Alfred Ritter Von Arbanitzky. By R. WORMELL, D. Sc., M. A. 1,096 pp., fully illustrated, med. 8vo, cloth. \$6.00.
"No richer work than this on the applications of electricity to modern life has ever appeared. It amounts to a cyclopedia of its kind. Though the text is free from surplage, it covers nearly 900 pages. While the book is in the highest degree scientific—and as such perfectly adapted to the wants of all earnest students of the subject—it is also popular in its form and style. Its (nearly) 850 illustrations, beautifully engraved, are a strong extra recommendation of its contents to the general reader."—JOURNAL OF COMMERCE.

THE DYEING OF TEXTILE FABRICS.

By J. J. HUMMEL, F.C.S., Professor and Director of the Dyeing Department of Yorkshire College, Leeds, Eng. 534 pages, 37 diagrams. \$2.00.
This Manual provides the Dyer with a text-book of exact scientific and practical information.

SPINNING WOOLLEN AND WORSTED.

Being a practical treatise for the use of all persons engaged in these trades. By WALTER S. BRIGHT McLAREN, M.A., Worsted-Spinner. With 59 Diagrams, 1 vol., 12mo. \$2.00.
"The design of this Manual is to describe in a concise form the principles of worsted and woollen spinning as exemplified in the machinery employed in the various processes of those trades."

STEEL AND IRON.

By W. H. GREENWOOD, F.C.S., Assoc. M.I.C.E. A new volume in Cassell's Manuals of Technology. Edited by Prof. AYRTON, F.R.S., and RICHARD WORMELL, D. Sc., M.A. \$2.00.
"It is a thorough and exhaustive treatise, beginning with the ore, and bringing it up step by step in all the different directions and through all the different processes along which and by means of which the pure metal is prepared for the different purposes of the special manufacturer. The style is clear, correct, luminous, and the illustrations are what illustrations are not always—real helps to the understanding of the subject matter."—N. Y. HERALD.

PHOTOGRAPHY FOR AMATEURS.

A Non-Technical Manual for the use of all. By T. C. HEPWORTH, Lecturer to the Late Royal Polytechnic Institution. With illustrations. Cloth, 60c.

THE ELECTRICIAN'S POCKETBOOK.

Being a translation of HOSPITALIER'S "Formulaire Pratique de l'Electricien." With additions by GORDON WIGAN, M.A., Barrister-at-Law, Member of the Society of Telegraph Engineers and Electricians. (A sheet of specially ruled paper for electrician calculation is included in this volume). Crown 8vo, cloth. \$2.00.

WATCH AND CLOCK MAKING.

By D. GLASGOW, Vice-President, British Horological Institute. \$2.00.
As a guide and text-book in the theory and practice of watch and clock making it is thorough and complete without being so minute and particular as to be confusing and wearisome to students in the art. Watch repairers, makers and students of Horological work and science will find the book instructive, valuable for reference and entertaining as giving a graphic account of modern Horology.

DESIGN IN TEXTILE FABRICS.

By THOMAS R. ASHENHURST, Head Master Textile Department Bradford Technical College. With ten colored plates and 160 designs. Glossary and complete index. 1 vol., 250 pages, extra cloth. \$2.00.
The reader is given as briefly and completely as possible the principles of design in textile fabrics in its broadest sense. The author has aimed to guide rather than to enter too closely into the minor details. Calculated to be of the greatest service, not only to designers, but also to all who would know something definite about the production of the figured stuffs which they wear, or with which they decorate their rooms."—ART AMATEUR.

CASSELL & CO., Limited, 739 & 741 Broadway, N.Y.

Bigelow Carpet Company,

ORIGINAL POWER-LOOM MANUFACTURERS OF

WILTON AND BRUSSELS CARPETS.

The Carpets made by this Company have received the highest award wherever exhibited, including Gold Medals at the Paris Exposition, 1878, and at the Centennial, 1876.

Their deserved reputation for excellence of fabric, richness and durability of color, novelty and beauty of design, has led to frequent infringements, and inferior goods have often been palmed off in their stead. For the protection of the public the Company has adopted as a trade mark the word "BIGELOW," which will be woven (at every repeat of the pattern) in white capitals into the back of the fabric. Customers will therefore have merely to examine the back of the carpet to be certain that they are getting the genuine Bigelow Wiltons or Body Brussels.

These Goods can be obtained from all first-class dealers.

HINTS AND NOTIONS.

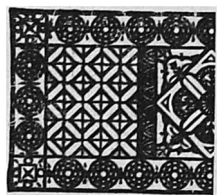

Readers will please mention THE DECORATOR
AND FURNISHER in writing our advertisers.

How to Dust a Room. There are two
ways of dusting a room. One is to take a
feather brush, and, by briskly whisking off the
polished surfaces of wood or marble, disperse
into the breathing air the entire quantity of
dust particles there accumulated. The other
is to carefully wipe with a cotton or silken
duster or chamois skin the needed articles, and
then shake out the cloth either into the open
air or into a fire-place in use, where the
draught of air would carry the dust up the
chimney. It is very hard work in a house
where there is furnace heat or soft coal fires to
keep the furniture dusted. An old silk hand-
kerchief makes a good duster.

Wall Colors for Dining-room. In a dining-
room having abundant light, such colors as
olive, of a middle shade, light green, purplish
or reddish brown and red of capucine, lakey
coral and scarlet hues may be prominent in the
composition. Where blue and white are in
patterns in which rich brown or Indian red
dominate, the latter are improved by their
presence.

**Polish for Brass Ornaments Inlaid in
Wood.** If the brass-work is very dull, file it
with a small, smooth file; then polish it with a
piece of soft felt dipped in Tripoli powder
mixed with linseed oil until the desired effect
is obtained.

Beautiful and Lasting for Ornamenting
Windows, Doors, Transoms, &c.

TO DECORATORS AND BUILDERS.

Venetian * Glass * Staining.

CASPAR-PEARL PATENTS, 1886.

**REAL LEADED AND JEWELLED STAINED GLASS
AT MODERATE COST.**

No Paper or Adhesive Substance used. The Latest and Best Method of Ornamenting
Glass, of every description, in exact appearance of the Antique Leaden
Window Sashings and Decorations now so popular.

PEARL'S "VENETIAN" PROCESS consists, first in selecting a sheet of glass of the de-
sired size, using either plain Window, Cathedral, Venetian, Crystalline, or other plain or tinted fancy
sheet glass, placing this over a design previously drawn, flat on a table. Over and following the design,
which shows through the glass, are firmly cemented Concave-convex Lead Strips, Circles, Curves, etc., as
the design requires. The joints being soldered with a cold liquid metal solder, using a brush: the sheet of
glass is now turned over, and the various sections colored with the VENETIAN TRANSPARENT
COLORS, either by flowing, or, if the design is small, using a flat brush. The colors set in a few
hours, after which the sheet is Leaded and soldered on THIS side. A coat of Preservative Var-
nish is then applied, and the work is complete.

In using a pale tinted Cathedral Glass, for a ground color, and adding a leaded design and staining
the sections, the appearance of the work is identical to Cathedral Glass of various colors cut in designs
and put together in the usual way with a lead frame and soldering iron. The difference cannot
be detected by an expert without breaking the glass.

Specimens of work in Mr. PEARL'S ART ROOMS have daily received the highest praise
by art critics and visitors generally. All are compelled to admit the work to be as beautiful and much
stronger than made in the usual way, and at about ONE-TENTH the cost.

Until May 1st for Ten Dollars we will send an outfit which consists of a Japanned
Box fitted with every requisite, viz.: Transparent Colors, Preservative Varnish, Medium, De-
tergent, Solder, Brushes, Palette Knife, Solder Pans, a supply of Leaden Strips and Circles, Eight Designs
of Windows, together with a Book of the most explicit directions, which will enable any one to do the
work without personal instruction.

Instruction or inquiries, either at Mr. Pearl's Studio, or by mail, Free. The
Outfit contains material sufficient to decorate a large house. The materials will be duplicated in parts,
as per Price List, which is enclosed in each box. We will forward our Book of Instructions on receipt of
six cents in stamps. We will license reliable parties to do this work in all parts of the country.
Call or address,

BRASS BEDSTEADS.

BRASS TABLES

Chairs, Easels, Screens
Fire Sets, Fenders,

ETC., ETC.,

IN BRIGHT-POLISHED, ANTIQUE OR
OXYDIZED FINISH, THAT DO NOT
REQUIRE CLEANING.

HINTS AND NOTIONS.

To remove Stains and Grease from a Carpet. A mixture which is excellent for removing grease spots and stains from carpet and clothing is made from two ounces of ammonia, two ounces of white castile soap, one ounce of glycerine, one ounce of ether; cut the soap fine, dissolve in one pint of water over the fire; add two quarts of water. This should be mixed with water in proportion to a tea-cupful to one ordinary sized pail of water. Mix thoroughly, and wash soiled garments in it. For removing spots use a sponge or clean flannel cloth, and with a cloth rub as dry as possible. Woolen goods may be made to look bright and fresh by being sponged with this.

Varnish for Fancy Work. An excellent varnish for hanging baskets, or for leather work, is made of half a pound of asphaltum in one pint of turpentine. Let it stand over night before using. Card-receivers and watch-receivers can be made out of butternut shells and varnished with this preparation. It is useful also for cones and acorns.

To Re-cover Piano Hammers. Get felt of graduated thickness, cut in strips the exact width, touch only the two ends with glue—not the part striking the strings. Hold in place with springs of narrow hoop iron.

ALKETHREPTA

Is a Pure and Nutritious Chocolate, made from a superior quality of Cocoa Bean, whose fine flavor and delicate aroma are preserved, thus obviating the necessity of using spices and flavoring extracts in its manufacture, which are excluded as being more or less of a medicinal character.

The highly Nutritious Butter of the Cocoa Bean is not extracted as in many Chocolates, but so treated in ALKETHREPTA as not to derange the most delicate stomach. It is, therefore, as its name signifies, a NOURISHER of STRENGTH.

It has been before the public a number of years and everywhere met the approval of the medical profession.

It is packed in half-pound tin boxes and sold by all Grocers.

61 Fifth Avenue,
NEW YORK.

HINTS AND NOTIONS.

Readers will please mention *The Decorator and Furnisher* in writing our advertisers.

Imitation Coral Coating. To imitate coral work on a pasteboard basket card receiver, dissolve sealing wax of the desired color in first-proof alcohol, and then stir in rice, sage and small pieces of tapioca. Then apply with a broad camel's hair brush. Enameled paintings may thus be produced, using several colors and shades of ceiling wax kept in separate vessels.

Hanging of Pictures. Small pictures should never be hung below large heavy ones; the latter appear best in narrow spaces between moldings and other convenient nooks, or, if of high merit, resting on cabinets or mantles. In all cases these should be as near as possible in line with the eye. A single subject vividly portrayed may even be mounted over the door.

Hearth Tiles. Mottled brown tiles in varied shades are now widely in use for hearths, their warmth and depth of tone contrasting well with the bright colored rays shining out from the pieces of incrustated parti-colored glass covering the jets of flame. They are in good keeping, also, with mahogany and cedar mantles.

The extreme brilliancy given to colors in the glass used for jewelry lamp screens, etc., is due to the presence of lead.

SAMUEL WEST,
Stained * Glass * Works

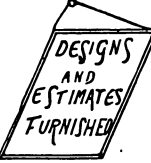

471 TREMONT ST., BOSTON.

Thirty years' experience in Stained Glass enables the subscriber to produce Modern and Medieval styles of work equal to any European examples, for

Churches, Private Residences, Halls, &c.

The value of the work is attained by a careful selection of colors in Cathedral, Antique and Opalescent Glass. Designs in accord with architect's plans furnished at short notice. Reference of work at office. Medals for excellence in Stained Glass from 1851.

ESTABLISHED 1869 **The Wells Glass Company** INCORPORATED 1883
MANUFACTURERS OF
ART STAINED GLASS.

 We have recently introduced the "Pyrographic" process of embossing in colors on a delicate, clear ground, and are now prepared to furnish this work in endless designs. It is especially adapted for doors, transoms, vestibule lights, office fittings, etc., etc.

HINTS AND NOTIONS.

How to Change Blue Prints to Dark Brown. Dissolve a piece of caustic potash about the size of an ordinary soup bean in five ounces of water. It will dissolve in a few minutes. Place your blue prints in this solution, and in a short time they will fade to a pale orange yellow color. When all the blue tints have disappeared, wash in clean water. Now dissolve a partly heaped up teaspoonful of tannic acid in about half a pint of water. Put your yellow prints into this bath, and they will immediately begin to assume a brown tone. Permit them to remain in the tannic bath until they are as dark as you desire, then take them out, wash well, and dry.—*American Machinist.*

To Preserve Steel Goods from Rust. After bright grates have been thoroughly cleaned, they should be dusted over with unslacked lime, and thus left until wanted. All the coils of piano wires are thus sprinkled, and will keep from rust for many years. Table-knives which are not in constant use ought to be put in a case in which sifted quick-lime is placed about eight inches deep. They should be plunged to the top of the blades, but the lime should not touch the handles.

It is an interesting fact that the earliest colored glass windows were architectural, not pictorial, and colors and style had reference to the design of the building. The pictorial in its development was for a long period influenced by architectural considerations, and, indeed, in ancient work these were seldom lost sight of.

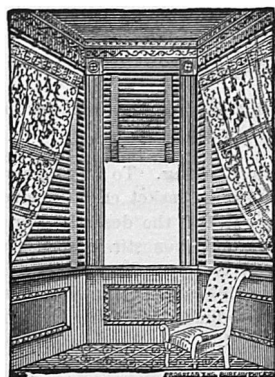

All descriptions of fanciful devices are to be seen in jewelry. Favorite pendants to gold chains are geometrically shaped, ebony and perfumed wood engraved with cabalistic character.

Varnish for Faded Rubber Goods. Black Japan varnish diluted with a little linseed oil.

ART EMBROIDERIES AND DESIGNS.

English Crewel and Silk of our own importation of unfading dyes. We make a specialty of Artistic Perforated Designs, also Monograms, Church and Society Emblems, etc.

A Perfect Deception Under the Carpets. Now Popular, and Thousands in Use.

THE BEST HOUSE BURGLAR-ALARM IN THE WORLD.
Indorsed by the Franklin Institute, American Institute, American District Telegraph Company, Electric Trade, the press, and public generally. Truly revolutionizes the work of thieves by night or day. Doors and windows closed or open. It is not necessary to recognize every window and door with this protection, but simply place a few mats at thoroughfares, the spring side down, accompanied with our prepared patent paper padding or edge trimming, the whole for a small outlay, and, being portable, is easily transferred from one house to another, consequently equally as valuable to renters as owners of property. (Also makes valuable attachment to old burglar alarms. The old practice of cutting through the panel of door or the glass of window will not evade this protection, and our improved continuous ringing bell, with battery, inclosed in fine cherry case, necessitates running but two wires, as per cut, instead of, as heretofore, to windows, etc., a network of wires. For stores and offices, to lay a large mat, covered with oil-cloth or other material inside the entrance, is found invaluable, and affords an open door; thus encourages trade. Send for particulars, reduced prices and increased discounts. Now furnished wholesale and retail in all unoccupied territory by
